

Function Name	Purpose
<code>ip.chksumvalid</code>	Verifies validity of IP checksum
<code>ip.genchksum</code>	Generates an IP checksum
<code>tcp.chksumvalid</code>	Verifies validity of TCP checksum
<code>tcp.genchksum</code>	Generates a TCP checksum
<code>udp.chksumvalid</code>	Verifies validity of UDP checksum
<code>udp.genchksum</code>	Generates a UDP checksum

Figure 16.3 The intrinsic functions predefined in NCL. When applied to a fragment, an intrinsic function produces partial results (e.g., a partial checksum).
