

```
predicate TCPvalid { tcp && tcp.cksumvalid }  
with { (TCPvalid) {  
    predicate SynFound { (tcp.flags & 0x02)}  
    rule NewConnection { SynFound } { start_conn(tcp_dport)}  
}
```

Figure 16.5 Illustration of a *with* statement used for conditional execution. The enclosed statements are executed only if the condition holds.
