

```
#include <ix/asl.h>          /* Include Intel's library declarations */
struct myace {              /* Programmer's control block */
    struct ix_ace ace;      /* Intel's ace embedded as first item */
    int    mycount;        /* Counter used by programmer's code */
    /* Programmer can insert additional data items here... */
}
```

Figure 23.9 An example ACE data declaration that contains an *ix_ace* structure plus one variable defined by the programmer. Additional variables can be added.
