

<b>Register Type</b>	<b>Relative</b>	<b>Absolute</b>
<b>General-purpose</b>	<b>register_name</b>	<b>@register_name</b>
<b>SRAM transfer</b>	<b>\$register_name</b>	<b>@\$register_name</b>
<b>SDRAM transfer</b>	<b>\$\$register_name</b>	<b>@\$\$register_name</b>

**Figure 24.3** The microengine assembler syntax used to denote a register type and the address mode. An at-sign always makes a name absolute.
